Subject: ENVIRONMENTAL, SAFETY AND HEALTH ISSUES

E.L. CAMBRIDGE

From/Location: D. D. Calhoun / AHR

To/Location: T. Cambridge / Tucson Research Lab

Attached are the Environmental, Safety and Health issues which should be included in the long-range plans for Primary Aluminum. Due to the short time in which we were required to prepare these issues, all of them have not been discussed with the individual facilities. We will be contacting the individual facilities next week with copies of our suggestions.
